To the Students and Parents of Shikhar Classes, I am writing to you today as Director of Shikhar Classes, with immense pride in our journey since 2010. Our primary objective has always been to provide students in Madhya Pradesh and in India with a top-notch studying experience as they prepare for competitive exams such as JEE (Mains), JEE (Advanced), and NEET (UG).

Over the past 15 years, Shikhar Classes has evolved from a coaching institute to one of the most successful Education Hub to study in the country, with a commitment to a rigorous curriculum and a unique and logical approach to problem-solving. Our core values include consistency in results, commitment, dedication, and fostering a conducive culture for learning. We have consistently achieved unparalleled results in the country, with a remarkable selection ratio of over 65% in IIT JEE Advanced exams.

We prioritize quality and strive to provide the best possible guidance to our students. In 2023, we expanded our services to offer guidance to students preparing for NEET (UG) exams as well. This has given huge returns where lots of our students improved their scores by multifold after studying with us.

We have even developed a simulation software named SimPhy, which helps students visualize concepts of Science and Maths in a really engaging way, and the response that we got from students about it was amazing. We use this in both senior classes as well as Foundation classes of Grade VIII, IX and X. Students in our foundation program have a knack for solving problems, we strive and work towards developing good aptitude, problem solving skills and a desire to learn new concepts in them.

Thank you for being a part of the Shikhar Classes family.

Your Sincerly

SimPHY — India's first 2D/3D Simulator

01

Custom Simulation Creation

Educators can design personalized simulations using intuitive drag-and-drop tools, enhancing the interactivity and engagement of physics lessons.

02

Extensive Simulation Library

SimPHY provides a vast collection of ready-to-use, interactive physics simulations aligned with the IIT-JEE curriculum, facilitating immediate integration into classroom teaching.

03

Comprehensive Lesson Plans

The platform includes well-structured lesson plans with targeted questions and tasks for each simulation, streamlining the onboarding process for both teachers and students.

04

3D Simulation and Scripting Support

Beyond 2D simulations, SimPHY supports 3D simulations and offers an IntelliSense Script Editor for scripting in JavaScript, enabling the creation of complex models and interactive scenarios.

05

Virtual Laboratory Environment

By simulating real-world physics experiments, SimPHY serves as a virtual lab, allowing students to explore and understand physical concepts in a controlled, digital setting.
